IMI Sensors Launches Brochure Highlighting Industrial Triaxial ICP® Accelerometers
Save Time and Money by Taking Three Simultaneous Vibration Measurements

December 17, 2015 DEPEW, NY – IMI Sensors, manufacturer of industrial vibration monitoring instrumentation, announced the release of new literature highlighting its industrial triaxial ICP® accelerometer product line.

The literature highlights the features of the product line, which include:

- Three concurrent readings reduce labor time and increase measurement consistency.
- Triaxial design that measures vibration in horizontal, vertical and axial directions with each sensing axis including its own dedicated microelectronic signal amplifier.
- Through-bolt design ideal for spaces with limited clearance.
- Wide variety of options available to accommodate most industrial applications:
 - 10 mV/g and 100 mV/g sensitivities.
 - Top and side connector positions.
 - Integral polyurethane and armored polyurethane cable options.

The data sheet can be found at:

For all technical inquiries and application support, please contact Meredith Christman via email at mchristman@pcb.com or via telephone at 716-684-0003 x2071.

About IMI-Sensors

IMI Sensors, a division of PCB Piezotronics, manufactures industrial vibration monitoring instrumentation, such as accelerometers, vibration transmitters and switches. These sensors feature rugged stainless steel housings and survive in harsh environments like paper and steel mills, mines, gas turbines, water treatment facilities and power plants. Integrating with portable analyzers and PLC's, IMI instrumentation helps maintenance departments reduce downtime and protect critical machinery. Our Platinum Stock Products program ensures fast delivery of over 10,000 sensors that are in stock and covered by a Lifetime Warranty. With a customer support team of more than 30 Customer Service Representatives and Application Engineers, IMI proudly stands behind their products with the services you value most, including 24-hour technical support, a global distribution network, and the industry's only commitment to Total Customer Satisfaction. Visit us at www.imi-sensors.com.
